

## PLANETS SONG

Mercury, Venus, Earth, Mars, Jupiter, Saturn, Uranus, Neptune.

Mercury is the closest planet to the sun.

Venus comes next; it's the hottest one.

Earth comes 3rd, the only life that we know.

Mars has the largest canyon and volcano.

The gassy planet Jupiter, the largest you will find.

Saturn has rings around the outside.

Uranus is funny 'cause it spins on its side.

Neptune looks blue, the coldest of its kind.

Okay, get ready. We're gonna say all the planets really really really really fast. Can you keep up?

We're gonna say all the planets from the first to the last.
